FOR IMMEDIATE RELEASE

**SECURE FIREARM PRODUCTS INTRODUCES THE PORTA-SAFE, A PORTABLE
HANDGUN SAFE FOR THE CAR, TRUCK, OR HOME.**

February 2005 - Secure Firearm Products has developed a new portable safe constructed of heavy-gauge steel and solid welded corners. The Porta-Safe has an exclusive all-internal locking system with a Medeco High Security Lock, and a precision hinged access door. This is not a quick entry system but a small single handgun safe for the car, truck, home, or office. Because of its unique design and special docking plate, the items you store inside are secure from tampering by thieves. The Porta-Safe is easily closed in a locked position to comply with state law on vehicle transportation. Extra docking plates can be purchased to attach the same safe in the home or office. The included medium-density foam can be cut to provide a secure and cushioned fit for most handgun models. See the Porta-Safe at www.securefirearmproducts.com, the 2005 SHOT Show, the 2005 NRA Bianchi Cup, and the 2005 National Matches in Camp Perry.
